

MASTER LECTURES

WITH DR. FRANCESCA VAILATI

You may have heard of the 3STEP technique as a treatment for erosion but what you don't know is that the 3STEP technique **is more than 15 years of research and successful treatments around the world.**

3STEP Academy cares about your continuous training.

In these Master-Lectures you will see the enormous updates in the 3STEP World of many topics to achieve an esthetic and functional stabilization of patients affected by different problems, such as bruxism, erosion, unstable occlusion, eating disorder, failing old crowns and bridges etc.

Since the goal of the 3STEP Academy is to **BRING YOUR DENTAL PRACTICE TO THE NEXT LEVEL**, we have selected 12 subjects to give to you an unique training, based on your needs and expectations.

During these two hours you will be given a 3STEP approach on all these subjects.

Looking forward to seeing you!

DISCOVER THE 12 SUBJECTS THAT WILL **BRING YOUR PRACTICE TO THE NEXT LEVEL, NEXT PAGES.**

01. WHO ARE YOU?

Which is your type of private practice? Are you aware about the type of Dentistry that you are doing? And the possibilities for a change?

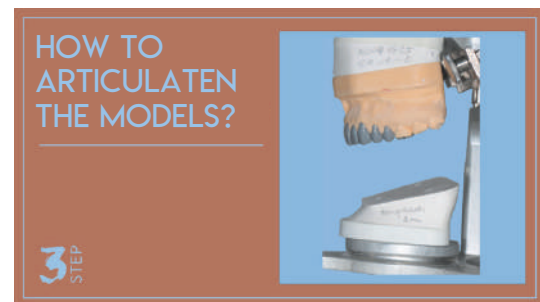

02. NO PAIN, LESS TIME, LESS MONEY

The 3STEP is method to stabilize the patients esthetically and functionally, not invasive and reversible. An overview on how the 3STEP approach can power your private practice.

03. 3STEP PHOTOS

3STEP protocol for the initial documentation. What to capture and why. Using the photos to do the diagnosis, to explain to the patient and communicate to the lab tec. Train your eyes...

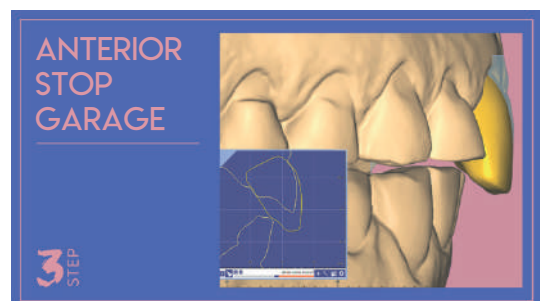

04. HOW TO ARTICULATEN THE MODELS?

For a full mouth rehabilitation, how do you articulate the models? Learn the simple 3STEP techniques to deprogramming the mandible before recording the bite.

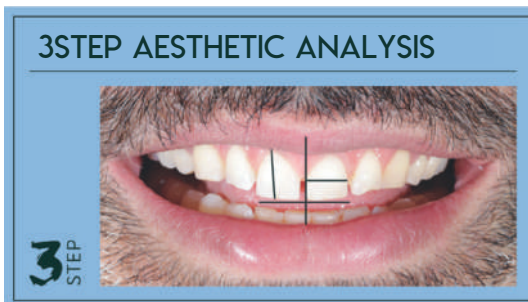

05. NOW WHAT?

Let's look at the models before starting the waxup, to plan better the full mouth rehabilitation.

06. ANTERIOR STOP GARAGE

How to decide the increase of the VDO? The Anterior STOP is the key. Use it to visualize also the anterior garage and the final anterior restorations.

07. 3STEP AESTHETIC ANALYSIS

The 3STEP esthetic analysis where patient, lab tec and you are on the same page.

08. EROSION

DENTAL EROSION, what you should know as a Dentist.

09. STEP 1 LAB

The LABORATORY 1 STEP: the external wax up, learn to evaluate the project before proposing it to the patient.

10. STEP 1 THE AESTHETIC

The first STEP of the 3STEP technique: the external mockup and the bite registration with the anterior stop/jig.

11. WHY TO CENTER MANDIBLE

Occlusal adjustments can be a nightmare, especially if you deal with a full mouth rehabilitation. When all the occlusal surfaces are changed, it is easy to be lost. Having a stable, starting position of the mandible is a must. A Centered mandible is a must.

12. PALATAL VENEERS LAB

Palatal veneers are unusual restorations that not all the laboratory technicians are capable to do. To help lab tech to improve their quality and clinicians to judge these restorations before delivering them, 10 parameters are illustrated. Based on these points clinicians will decide if the palatal veneers are perfect, unacceptable or clinical acceptable after some modifications.
