

LOV&FUNCTION

Let's correlate occlusion... to the rest of the body!

A 3STEP Academy Course
by Francesca Vailati

3STEPACADEMY

THE COURSE

LOV&FUNCTION is a 3-day course that, in addition to covering THE TOPICS of the FUNFUNCTION course, includes an extra day for a more in-depth exploration of the function of the mouth.

Maintaining the very pragmatic approach typical of the 3STEP Gnathology, new topics will be illustrated such as the development and the ageing of the oral cavity, the role of the tongue and the lips to enrich your global vision and meet the needs of a wider group of dysfunctional patients.

“I wish there was more time”. This is often the participants’ impression after the 2-day FUNFUNCTION course. Therefore, the LOV&FUNCTION course was conceived: 3 full days to discuss all the 3STEP Gnathological topics and, most importantly, to give the participants more time to assimilate them!

This course is recommended for clinicians who feel the need to get more training in FUNCTIONAL diagnosis, being frustrated with treating dysfunctional patients without understanding their complexity. A more advanced experience in treating these patients is necessary to better take advantage of the value of the information given in the course.

THE PROGRAM

DAY 1

- 1.30 h Why Gnathology?

- 1.30 h Advanced Diagnosis

- 1.30 h Anterior Functional Conflicts

- 1.30 h **HANDS ON**
3STEP Functional Exam

DAY 2

- Introduction to the occlusal adjustments

- Chewing Patterns

- The GTest

- HANDS ON**
The GTest

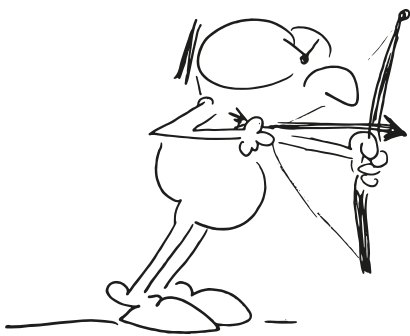

DAY 3

- Mouth Development

- Mouth Ageing

- Tongue and Breathing

- HANDS ON**
How to Register the Bite

THE OBJECTIVES

DAY 1 & 2 (The same in the FUNFUNCTION COURSE)

- Classify the chewing patterns of patients
- Learn how to do and interpret the results of a GTest
- Understand the Anterior functional conflicts that lead to incisal edge wear
- Understand the functional causes that led to the damage (fracture of the restorations, wear of the teeth, occlusal instability)
- Introduction to the occlusal adjustments

DAY 3 SPECIAL

- Explain the correct **development** of the mouth
- Describe how the teeth will **age** based on different paths of chewing
- Discover the amazing role of the **tongue**
- Learn how to record a **bite registration** to start the 3STEP rehabilitation

To your **deeper** functional questions...
this course will have the ANSWER!

THE ANTERIOR GARAGE

Are there negative consequences for a mandible locked by the WALL?

AGEING AND WEAR

The teeth physiologically wear, but when does wear become pathological?

PLANAS AND WILD CHEWING

Can kids complete a correct development of their oral hypofunction?

TONGUE

Breathing and swallowing, two primordial functions to evaluate for the stability of the dental rehabilitation.
